

COIN FIRE AND RESCUE UPDATES FIRE STATION DOORS

Coin Fire and Rescue recently updated their station doors with the addition of electric garage door openers to the fire station. A grant in the amount of \$4,150 received from the Clarinda Foundation and a portion of the money (\$149) made from the Fire and Rescue's Annual Fish Fry provided the funds for this project. The remaining funds raised from the fish fry will be going to update fire fighter equipment.

This project will provide a faster response time as previously the doors had to be manually operated. In addition, the doors were heavy and awkward. Residents of Coin, Northboro, Blanchard and rural areas in between will benefit from the faster response time.
